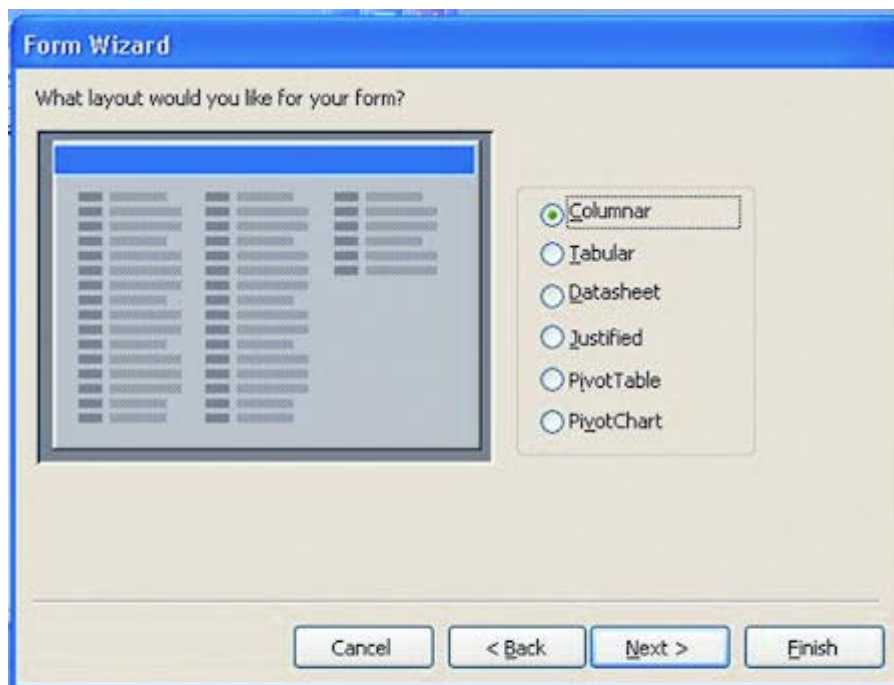

**Fig. 3.** This is the view of the table after you have entered two patients. Note that nothing needs to be entered in the Autonumber field. Note, too, that the table view will truncate the field and show only a portion of it. However, the entire field will show in the form that will be created.

**Fig. 4.** On this screen the Form Wizard is selected.

**Fig. 5.** On this screen, select the correct table and the fields for the form.

**Fig. 6.** Select columnar layout.

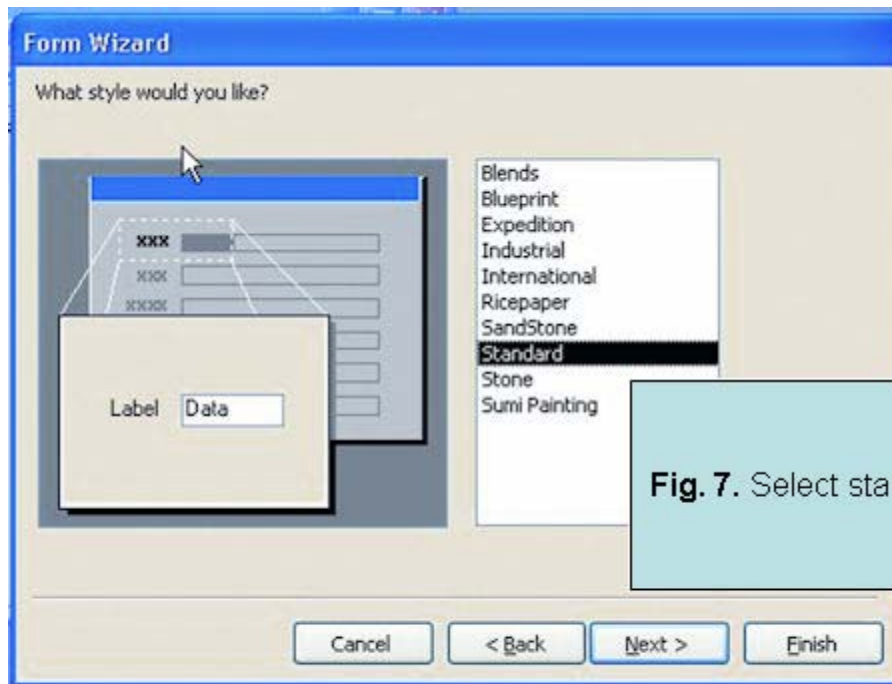

Fig. 7. Select standard style.

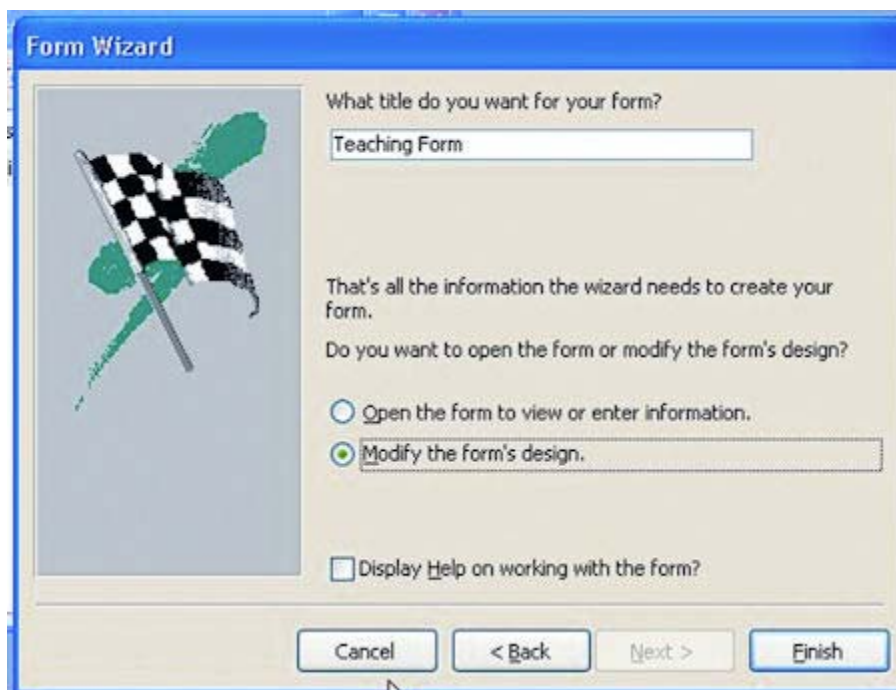

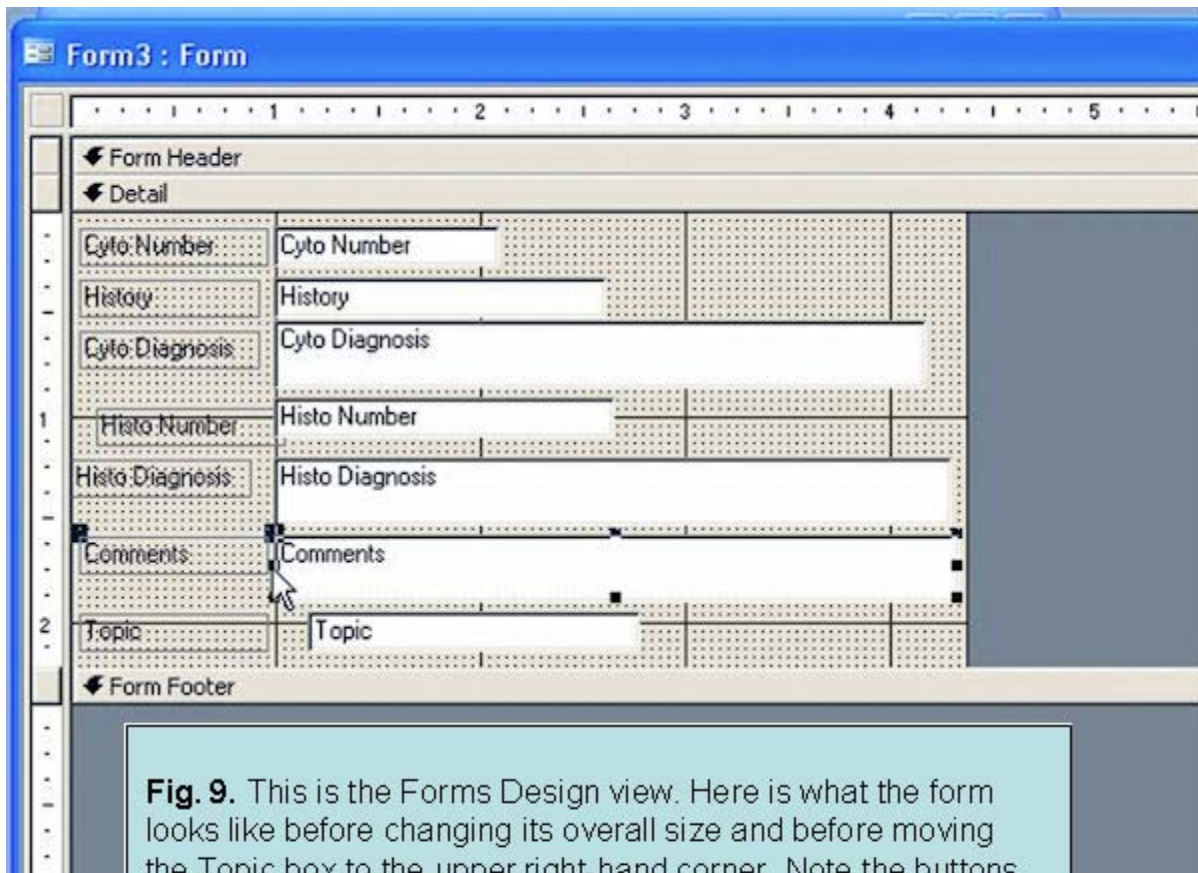

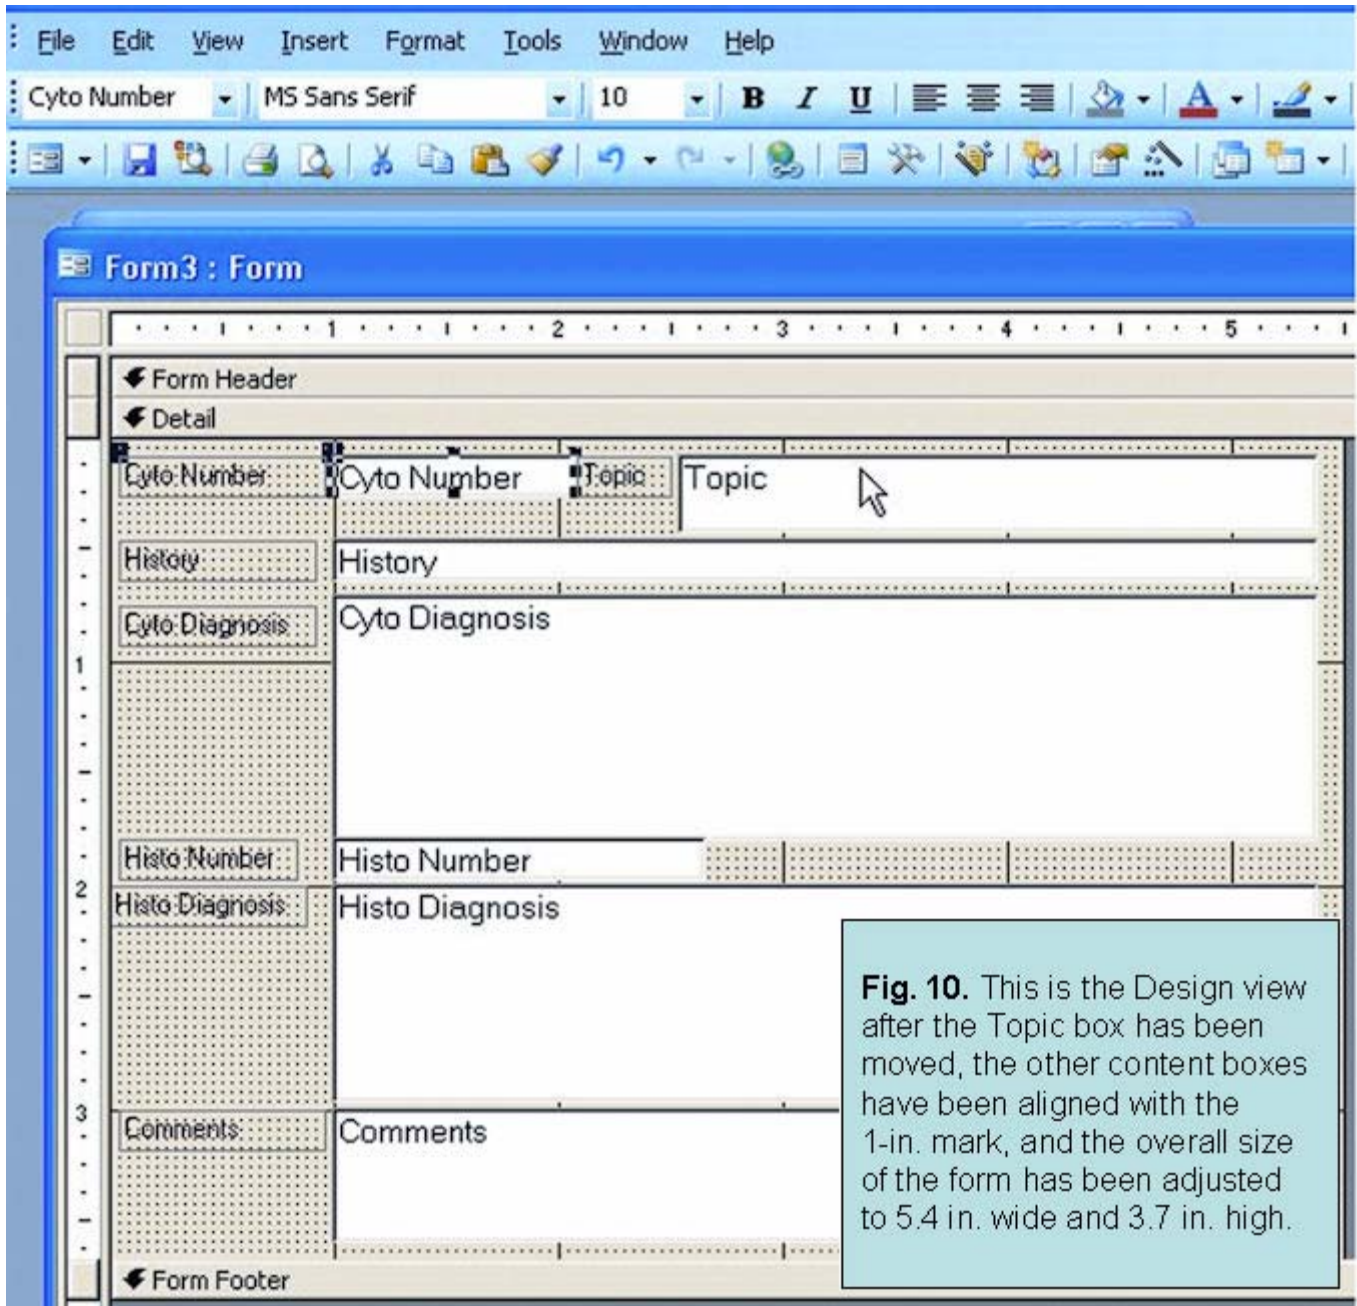

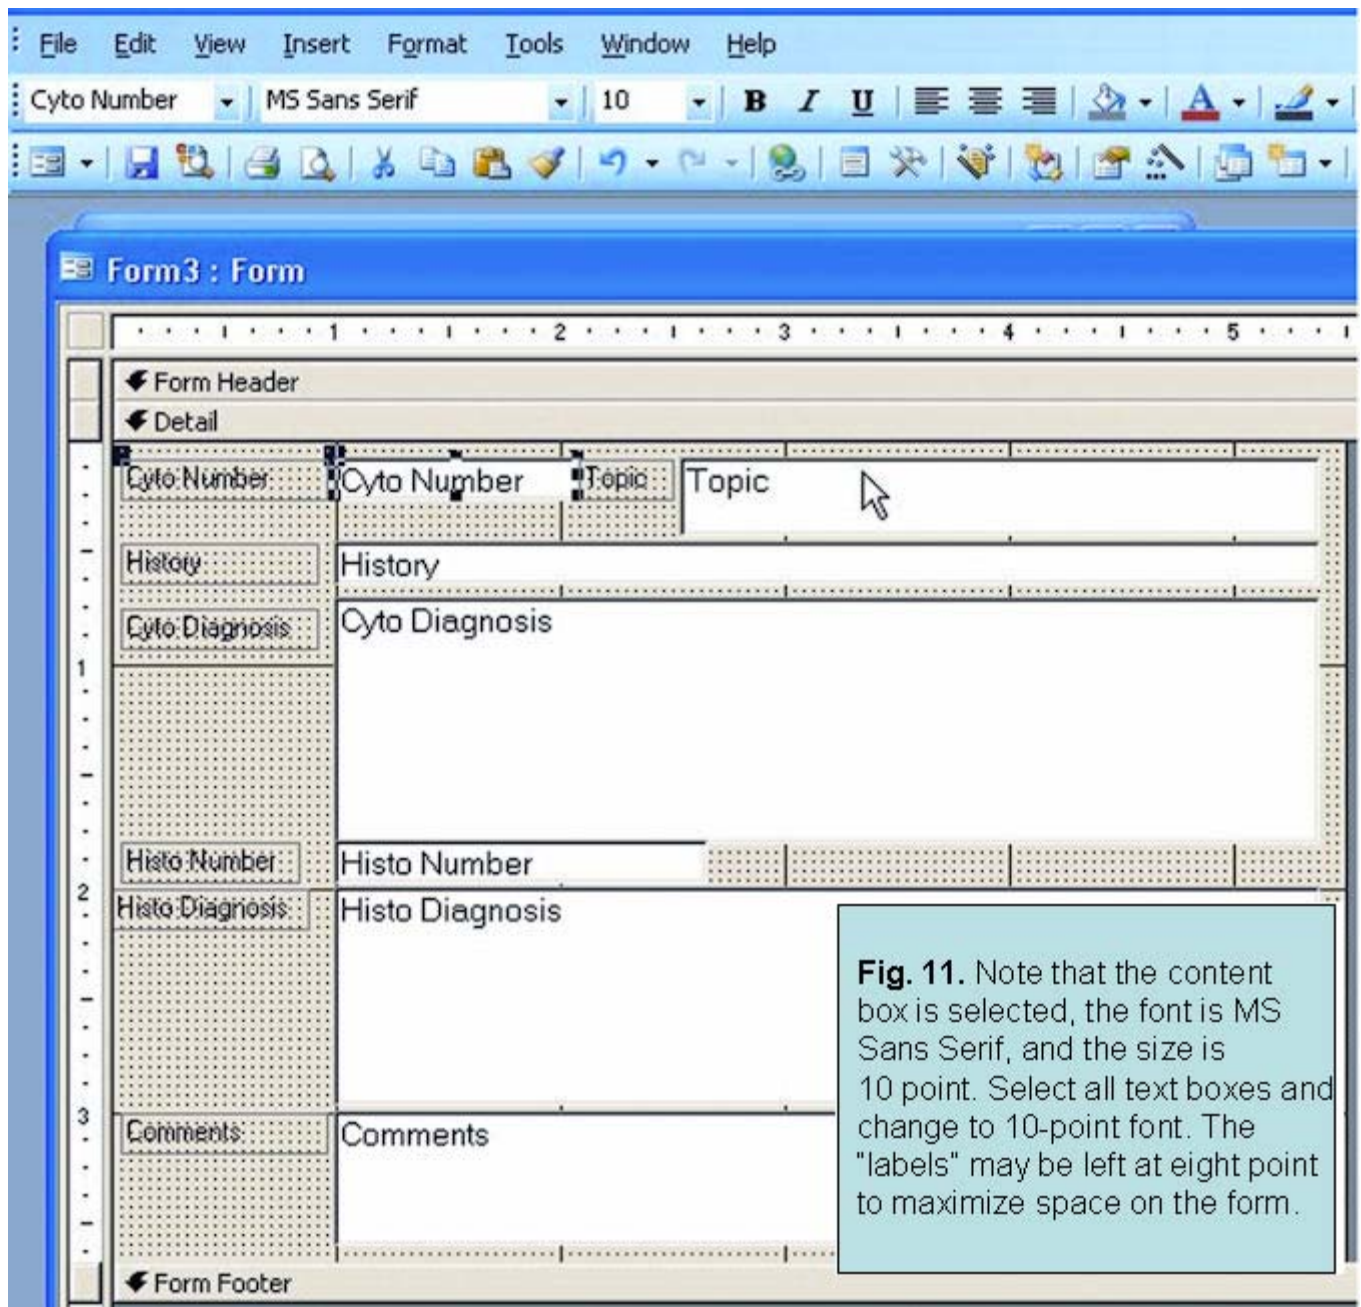

Fig. 8. The last page of the Form Wizard. Select "Modify the form's design" and then click Finish; then the program will display the Forms Design page so further adjustments can be made.

**Fig. 9.** This is the Forms Design view. Here is what the form looks like before changing its overall size and before moving the Topic box to the upper right-hand corner. Note the buttons on the content box; they can be used to adjust the overall size of the box.

Teaching Form

Cyto Number: N07-345    Topic: GIST

History: 58 y.o. male

Cyto Diagnosis: Duodenum, FNA-EUS: Gastrointestinal stromal tumor vs. leiomyosarcoma.

Histo Number: S07-432, gastric bx.

Histo Diagnosis: GIST, IHC + for CD117

Comments: Note spindle cells. These tumors have been found to be the result of a cytogenetic abnormality (cKIT). Treatment can include medication which is a tyrosine kinase inhibitor. CD117 is a marker for GIST and is not present in leiomyosarcoma.

Record: 2 of 2
