Preface	viii	<i>A Closer Look At...Bite Cell Formation and Morphology</i>	70
Acknowledgements	ix	Blister Cell (Pre-Keratocyte).....	72
Proficiency Testing in Hematology: An Overview	2	<i>A Closer Look At...Vacuolated Non-Nucleated Red Blood Cells</i>	74
Granulocytic (Myeloid) Cells		Echinocyte.....	76
Introduction	5	<i>A Closer Look At...Spiculated Red Cells</i>	78
Myeloblast.....	6	Fragmented Cell (Schistocyte, Helmet Cell, Keratocyte).....	80
<i>A Closer Look At...Acute Nonlymphocytic Leukemia</i>	8	<i>A Closer Look At...Microangiopathic Anemias</i>	82
Promyelocyte.....	10	<i>A Closer Look At...Diagnostic Morphology in MAHA and Heinz Body Anemia</i>	84
Myeloblast/Promyelocyte with Auer Rod(s).....	12	Macrocyte (Oval or Round).....	86
<i>A Closer Look At...Auer Bodies</i>	14	Microcyte (with Central Pallor)	88
Myelocyte, Neutrophilic	16	Ovalocyte (Elliptocyte).....	90
<i>A Closer Look At...Post-Mitotic Myeloid Precursors</i>	18	<i>A Closer Look At...Hereditary Elliptocytosis</i>	92
Metamyelocyte, Neutrophilic.....	20	Polychromatophilic Red Cell (Non-Nucleated)	94
Band, Neutrophilic.....	22	Sickle Cell	96
Segmented Neutrophil	24	<i>A Closer Look At...Sickle Cell Anemia</i>	98
<i>A Closer Look At...Is it a Band or Segmented Neutrophil?</i>	26	Spherocyte	100
Basophil.....	28	<i>A Closer Look At...Red Cell Membrane Loss and Spherocytosis</i>	102
Eosinophil (any stage).....	30	Stomatocyte	104
<i>A Closer Look At...Eosinophilia</i>	32	Target Cell.....	106
Monocytes, Immature	34	<i>A Closer Look At...How Target Cells Form</i>	108
Monocyte.....	36	Teardrop Cell.....	110
<i>A Closer Look At...Life Cycle of Monocytes</i>	38	<i>A Closer Look At...How Teardrop Cells Form</i>	112
Toxic Granulation and/or Multiple Toxic Vacuoles ..	40	Reticulocyte (Supravital Stain).....	114
Döhle Body with/without Toxic Granulation.....	42	Basophilic Stippling (Coarse)	116
<i>A Closer Look At...Acquired Neutrophil Abnormalities</i>	44	<i>A Closer Look At...How Basophilic Stippling Forms</i>	118
<i>A Closer Look At...May-Hegglin Anomaly</i>	46	<i>A Closer Look At...Red Cell Inclusions</i>	120
Metamyelocyte, Giant (Bone Marrow)	48	Heinz Body	124
Band Neutrophil, Giant (Bone Marrow)	50	<i>A Closer Look At...How Heinz Bodies Form</i>	126
Hypersegmented Neutrophil	52	Hemoglobin C Crystal.....	128
Neutrophil with Dysplastic Nucleus/Agranular Cytoplasm.....	54	Hemoglobin H Inclusions (Supravital Stain).....	130
<i>A Closer Look At...Myelodysplastic Syndromes</i>	56	<i>A Closer Look At...Different Types of Precipitated Hemoglobin</i>	132
Pelger-Huët Anomaly	58	Howell-Jolly Body (Wright-Giemsa stain).....	134
		Howell-Jolly Body (Iron Stain)	136
		<i>A Closer Look At...Howell-Jolly Body Formation</i>	138
		Pappenheimer Bodies (Wright-Giemsa Stain)	140
		Pappenheimer Bodies (Iron Stain).....	142
		<i>A Closer Look At...How Pappenheimer Bodies Form</i>	144
		Red Cell Agglutinates.....	146
		Rouleaux	148
		<i>A Closer Look At...Sticky Red Blood Cells</i>	150
Erythrocytic Cells and Inclusions			
Introduction	61		
Erythrocyte (Normocytic, Normochromic).....	62		
Acanthocyte	64		
<i>A Closer Look At...How Acanthocytes Form</i>	66		
Bite Cell.....	68		

Nucleated Red Cells

Introduction	153
Pronormoblast (Bone Marrow).....	154
<i>A Closer Look At...</i> Red Cell Maturation and Cell Division	156
<i>A Closer Look At...</i> Morphologic Keys to Identifying Early Normoblasts	158
Basophilic Normoblast (Bone Marrow).....	160
Polychromatophilic Normoblast (Bone Marrow) ...	162
Orthochromic Normoblast (Bone Marrow)	164
Nucleated Red Cell, Megaloblastic (Bone Marrow)	166
<i>A Closer Look At...</i> Megaloblastic Morphology.....	168
Nucleated Red Cell, Normal or Abnormal (Blood)	170
Nucleated Red Cell, Dysplastic (Bone Marrow)	172
<i>A Closer Look At...</i> Megaloblastic vs. Megaloblastoid Erythroid Maturation	174
Sideroblast (Iron Stain)	176
<i>A Closer Look At...</i> Sideroblasts and Siderocytes	178
Sideroblast, Ringed (Iron Stain).....	180
<i>A Closer Look At...</i> Hemoglobin Formation and Iron Utilization.....	182
<i>A Closer Look At...</i> Formation of Ringed Sideroblasts	184

Megakaryocytic Cells and Thrombocytes

Introduction	187
Megakaryocyte or Precursor, Normal.....	188
<i>A Closer Look At...</i> Megakaryocyte Maturation.....	190
Megakaryocyte or Precursor, Abnormal	192
<i>A Closer Look At...</i> Dysplastic Megakaryocytes	194
Megakaryocyte Nucleus.....	196
Platelet, Normal.....	198
<i>A Closer Look At...</i> Platelet Formation	200
Platelet, Giant.....	202
Platelet, Hypogranular	204
Platelet Satellitism.....	206
<i>A Closer Look At...</i> Platelet Satellitism.....	208

Lymphocytic and Plasmacytic Cells

Introduction	211
Hairy Cell.....	212
<i>A Closer Look At...</i> Hairy Cell Leukemia.....	214
Lymphoblast.....	216
Lymphocyte, Mature	218
<i>A Closer Look At...</i> Normal vs. Reactive Lymphocytes	220
Lymphocyte, Reactive	222
<i>A Closer Look At...</i> Reactive vs. Neoplastic Lymphocytes.....	226
Lymphoma Cell	228
<i>A Closer Look At...</i> Normal Lymphocyte Maturation and Malignant Transformation	230
<i>A Closer Look At...</i> B Cell Neoplasms	232
<i>A Closer Look At...</i> T Cell and Putative NK Cell Neoplasms	236
Plasma Cell, Mature.....	238
<i>A Closer Look At...</i> Plasma Cell Maturation.....	240
Plasma Cell, Immature or Abnormal (Myeloma Cell).....	242
Plasma Cell or Precursor with Inclusion Body	244
Prolymphocyte	246
<i>A Closer Look At...</i> Prolymphocytes.....	248
Sézary Cell.....	250

Microorganisms

Introduction	253
<i>Babesia</i>	254
<i>A Closer Look At...</i> <i>Babesiosis</i> vs. <i>Malaria</i>	256
Bacteria (Cocci or Rod), Extracellular.....	258
Bacteria (Spirochete).....	260
Fungi, Extracellular	262
Leukocyte (Blood) with Phagocytized Bacteria	264
Leukocyte (Blood) with Phagocytized Fungi.....	266
Macrophage with <i>Histoplasma</i> , <i>Leishmania</i> , or <i>Toxoplasma</i>	268
Macrophage with Phagocytized Mycobacteria	270
Malaria (Intracellular and Extracellular)	272
<i>A Closer Look At...</i> Species Differences Among Malarial Parasites	274
Microfilaria	276
<i>A Closer Look At...</i> Species Differences Among Microfilariae	278
Protozoan (Non-Malarial)	280
<i>A Closer Look At...</i> African Trypanosomiasis	282

Artifacts

Introduction	285
Basket Cell or Smudge Cell	286
Neutrophil Necrobiosis	288
<i>A Closer Look At...Cell Death</i>	290
Erythrocyte with Overlapping Platelet	292
Stain Precipitate	294

Miscellaneous Cells

Introduction	297
Blast Cell	298
<i>A Closer Look At...Antigen Markers in Blastic Cells</i>	300
Alder's Anomaly Inclusion	302
Chédiak-Higashi Anomaly Inclusion	304
<i>A Closer Look At...Cytoplasmic Inclusions in Neutrophils</i>	306
Endothelial Cell	308
Epithelial Cell	310
Lipocyte	312
<i>A Closer Look At...Bone Marrow Microenvironment</i>	314
Macrophage (Histiocyte)	316
Macrophage with Phagocytized Red Cell (Erythrophagocytosis)	318
<i>A Closer Look At...Cytoplasmic Inclusions in Bone Marrow Cells</i>	320
Gaucher Cell and Pseudo-Gaucher Cell	322
Histiocyte, Sea Blue	324
Niemann-Pick Cell, Foamy Macrophage	326
Mast Cell	328
<i>A Closer Look At...Mast Cells vs. Basophils</i>	330
Metastatic Tumor Cell	332
Mitotic Figure	334
Osteoblast	336
<i>A Closer Look At...Osteoblast vs. Plasma Cell</i>	338
Osteoclast	340

A Closer Look At... Discussions **(Alphabetical Listing)**

Acquired Neutrophil Abnormalities.....	44	May-Hegglin Anomaly.....	46
Acute Nonlymphocytic Leukemia.....	8	Megakaryocyte Maturation.....	190
African Trypanosomiasis.....	282	Megaloblastic Morphology.....	168
Antigen Markers in Blastic Cells.....	300	Megaloblastic vs. Megaloblastoid Erythroid Maturation.....	174
Auer Bodies.....	14	Microangiopathic Anemias.....	82
B Cell Neoplasms.....	232	Morphologic Keys to Identifying Early Normoblasts.....	158
Babesiosis vs. Malaria.....	256	Myelodysplastic Syndromes.....	56
Bite Cell Formation and Morphology.....	70	Normal Lymphocyte Maturation and Malignant Transformation.....	230
Bone Marrow Microenvironment.....	314	Normal vs. Reactive Lymphocytes.....	220
Cell Death.....	290	Osteoblast vs. Plasma Cell.....	338
Cytoplasmic Inclusions in Bone Marrow Cells.....	320	Plasma Cell Maturation.....	240
Cytoplasmic Inclusions in Neutrophils.....	306	Platelet Formation.....	200
Diagnostic Morphology in MAHA and Heinz Body Anemia.....	84	Platelet Satellitism.....	208
Different Types of Precipitated Hemoglobin.....	132	Post-Mitotic Myeloid Precursors.....	18
Dysplastic Megakaryocytes.....	194	Prolymphocytes.....	248
Eosinophilia.....	32	Reactive vs. Neoplastic Lymphocytes.....	226
Formation of Ringed Sideroblasts.....	184	Red Cell Inclusions.....	120
Hairy Cell Leukemia.....	214	Red Cell Maturation and Cell Division.....	156
Hemoglobin Formation and Iron Utilization.....	182	Red Cell Membrane Loss and Spherocytosis.....	102
Hereditary Elliptocytosis.....	92	Sickle Cell Anemia.....	98
How Acanthocytes Form.....	66	Sideroblasts and Siderocytes.....	178
How Basophilic Stippling Forms.....	118	Species Differences Among Malarial Parasites.....	274
How Heinz Bodies Form.....	126	Species Differences Among Microfilariae.....	278
How Howell-Jolly Bodies Form.....	138	Spiculated Red Cells.....	78
How Pappenheimer Bodies Form.....	144	Sticky Red Blood Cells.....	150
How Target Cells Form.....	108	T Cell and Putative NK Cell Neoplasms.....	236
How Teardrop Cells Form.....	112	Vacuolated Non-Nucleated Red Blood Cells.....	74
Is it a Band or Segmented Neutrophil?.....	26		
Life Cycle of Monocytes.....	38		
Mast Cells vs. Basophils.....	330
