Foreword ................................................................. xiii
Stanley J. Robboy

Preface .......................................................................... xiv

Acknowledgements and Contributors .............................. xv

1 Management Principles ................................................ 1
Richard E. Horowitz, Elizabeth A. Wagar, Isam-eldin A. Eltoum
History of Management, 1
Principles of Management, 3
The Primary Leadership in the Laboratory: The Pathologist, 5
The Primary Planning Procedure: The Strategic Plan, 7
Case Example: How to Lead, 10
Appendix 1-1. Leadership Competencies, 11
Appendix 1-2. Motivation Strategies, 12
Appendix 1-3. How to Make a Decision, 12
Appendix 1-4. Performing a SWOT Analysis, 13
Appendix 1-5. Maslow’s Need Categories, 14
Appendix 1-6. Herzberg’s Satisfiers and Dissatisfiers, 14

2 Competencies and Interfaces of the Involved Pathologist .... 15
Richard E. Horowitz, Elizabeth A. Wagar, Isam-eldin A. Eltoum
Competencies of the Involved Pathologist, 15
Interfacing with Clinicians, 17
Interfacing with the Medical Staff, 18
Interfacing with Hospital or System Administration, 20
Interfacing with the Laboratory Staff, 21
Interfacing with the Pathology Group, 24
Interfaces Beyond the Hospital, 25
Strategies for Improving Interfaces, 26
Appendix 2-1. Options for Satisfying Pathologists’ General Competencies and for Ongoing and Focused Professional Practice Evaluation (OPPE and FPPE), 28
Appendix 2-2. Model Privilege Delineation Form, 28
Appendix 2-3. How to Conduct a Meeting, 29
Appendix 2-4. How to Give a Talk, 30
Appendix 2-5. Assembling a Medical Staff Newsletter, 32
Appendix 2-6. Annual Report of a Pathology Department, 32
Appendix 2-7. Pathologist Performance Evaluations, 33
Appendix 2-8. Laboratory Specialty Societies, 34
3 Laboratory Operations ................................................................. 35
    Elizabeth A. Wagar, Richard E. Horowitz
    History, 35
    Organization, 36
        The Organizational Chart, 36
        The “Test” as the Fundamental Unit of Operations, 38
        Test Ordering Subsystem, 38
        Specimen Acquisition Subsystem, 39
        Testing Subsystem, 40
        Billing Subsystem, 40
        Reporting Subsystem, 41
    Describing the “Work” of Laboratory Operations, 43
    Organizational Charts, Policies, and Procedures, 43
    Test Development, 44
    Point-of-Care and Ancillary Testing, 45
    Signs and Symptoms of Poor Laboratory Operations, 46
    Diagnosis and Treatment of Poor Laboratory Operations, 47
    Other “Systems” for Improving Laboratory Operations, 47
    Appendix 3-1. Standard Operating Procedure Format, 49

4 Personnel Management ............................................................. 59
    Elizabeth A. Wagar, Richard E. Horowitz
    Human Resources, 59
    Rights and Responsibilities of Management, 60
    Governmental Regulations, 60
        National Labor Relations Act, 61
        Fair Labor Standards Act, 61
        Equal Pay Act, 61
        Civil Rights Act, Title VII, 62
        Executive Order No. 11246, 62
        Americans with Disabilities Act, 62
        Family and Medical Leave Act, 63
    Unions and Civil Service, 63
    The Job and the Job Description, 64
    Recruitment and Selection, 66
    Interviews, 67
    Compensation, 67
    Hiring and Orientation, 68
    Scheduling and Staffing, 68
    Performance Appraisal, Annual Review, and Competencies, 69
    Employee Retention, 70
    Counseling and Discipline, 70
    Termination, 71
    Appendix 4-1. Interviewing Strategies, 72
    Appendix 4-2. Sample Questions for a Behavior-Based Interview, 72
    Appendix 4-3. Employee Handbook Contents, 73
    Appendix 4-4. Sample Performance Evaluation Template, 74

5 Equipment, Supplies, and Space .................................................. 75
    Richard E. Horowitz, Elizabeth A. Wagar
    Introduction, 75
    Equipment Acquisition, 75
6 Management of Pathology Information Systems ................................. 87
James H. Harrison Jr.
Definition of Pathology Informatics, 87
Early Development and Growth of Laboratory Information Systems, 87
Maturation and Adoption, 88
Recent Developments and Challenges, 90
Computer Basics, 90
Data Representation, 91
Image Compression, 92
Data Standards, 92
General Characteristics of Laboratory Information Systems, 94
Database Applications, 95
Data Warehousing and Mining, 97
Computer Networking, 97
System Interfaces and HL7, 98
System and Data Security, 100
Disaster Recovery, 103
Systems and Personnel, 103
Application Management, 104
Interface Management, 106
Other Systems, 106
Record Retention, 106
Procedure Manual, 107
System Evaluation, Selection, and Installation, 107
Performance Monitoring and Quality Assurance, 110
Software Tools and Local Software Development, 110
Diagramming Tools for Requirements Analysis and Workflow Redesign, 110
Discussion, 111
Case Examples, 113, 115
Appendix 6-1. Site Visit Questions for LIS Acquisition, 118

7 Quality Management in Laboratory Medicine ................................. 119
David S. Wilkinson, Elizabeth A. Wagar
History of Quality Management, 119
Elements of a Quality Management Plan, 121
  Organization, 121
  Personnel Resources, 122
  Equipment, 122
  Supplies and Suppliers, 122
  Customer Issues, 122
  Process and Performance Control, 122
  Documents and Records, 123
  Occurrence Management, 123
  Assessments and Audits, 123
  Process and Performance Improvement, 124
  Facilities and Safety, 125
Information Management, 125
Customer Service and Satisfaction Surveys, 126
Responsibilities of Laboratory Directors and Pathologists, 126
Making the Quality Management Plan Operational, 126
Tool, Metrics, and Outcomes, 127
Statistical Control Charts, 127
Process Design Charts and Workflow, 128
Root Cause Analysis and Failure Mode and Effects Analysis, 130
Lean and Six Sigma, 130
External Quality Activities, 131
Quality Dashboards, 131
Ensuring Patient Safety in the Laboratory, 132
Disaster Preparedness in the Laboratory, 133
Case Example of Health Care Error: The Swiss Cheese Model, 134
Appendix 7-1. Physician Satisfaction Survey, 135
Appendix 7-2. Event Reporting Form, 136

8 Quality Assurance in Anatomic Pathology .................................................. 137
Michael O. Idowu, Raouf E. Nakhleh
Early Quality Assurance Efforts in Anatomic Pathology, 137
Principals of Quality Assurance, 138
Metrics for Anatomic Pathology, 138
Preanalytic Phase, 140
Analytic Phase, 141
Rates of Correlation Between Intraoperative Consultation and Final Diagnosis, 142
Gynecologic Cytology–Histology Correlation, 142
Intradepartmental Peer Review, 143
Amended Report Review, 144
Postanalytic Phase, 145
Surgical Pathology Report Completeness, 145
Informatics and Report Integrity, 145
Turnaround Time, 145
Customer Satisfaction, 146
Responsibilities of the Laboratory Director, 146
Controversies in Anatomic Pathology: Immunohistochemistry Test Validation, 147
Summary, 148
Case Example: Human Epidermal Growth Factor 2, 148

9 Financial Management of the Laboratory ..................................................... 151
Elizabeth A. Wagar, Isam-eldin A. Eltoum, Richard E. Horowitz
History, 151
Responsibilities, 152
Policies and Procedures, 153
Business Plan, 153
Budgeting Process, 153
Rate Setting, 155
Operating Statement, 156
Billing and Collection, 158
Outcomes and Metrics, 158
Test Cost Analysis, 158
Break-Even Analysis, 158
Workload Recording, 159
Contents

10 Financial Management of the Pathology Practice ........................................ 165

C. Bruce Alexander, Richard E. Horowitz, Ronald L. Weiss

Part A

Introduction, 165

History, 166

Practice Categories, 167

Sources of Income, 168

Salary Arrangements, 168

Managed Care Organizations, 168

Part B

Responsibilities, 170

The Management Fee, 170

Hospital Pathology Group, 171

The Accountant, 172

Academic Pathology Group, 172

Commercial Laboratory, 172

Planning and Budgeting, 173

Billing and Collections, 175

Insurance and Risk Management, 179

Pension Fund Management, 182

401(k) Plan, 183

403(b) and 457 Plans, 183

Individual Retirement Account, 183

Roth Individual Retirement Account, 183

Profit-Sharing and Bonuses, 183

Pension Administration, 183

Accounting and Auditing, 184

Debit and Credit, 184

General Ledger, 184

Balance Sheet, 184

Operating Statement, 184

Funds Flow Statement, 185

Audit, 185

Contracting, 185

Contracting with Hospitals, 185

Managed Care Contracting, 187

Marketing and Public Relations, 189

Financial Planning, 190

Loan Repayment, 190

Personal Financial and Estate Planning, 190

Marketing Strategies, 187

Collaboration and Contracting, 185

Appendix 9-1. Typical Budget Calendar, 164
Consumer Credit and Debt, 191
Savings and Investments, 191
Retirement and Estate Planning, 191
Appendix 10-1. What to Expect from a Billing Service, 193
Appendix 10-2. Marketing and Public Relations, 194

11 The Pathology Position .......................................................... 197
Richard E. Horowitz, Michael O. Idowu, Gene P. Siegal
Where Do Pathologists Work?, 197
What Will Be Expected?, 199
Where to Find a Job, 199
How to Evaluate the Position, 200
   Evaluating the Town, 200
   Evaluating the Hospital and Medical Community, 201
   Evaluating the Pathology Group, 201
Curriculum Vitae with Cover Letter, 202
The Job Interview: How to Prepare, 203
The Contract: Definitions, Assumptions, Prerequisites, and Types, 205
   Types of Contracts, 206
   The Employment Agreement, 206
   Malpractice Insurance, 207
   Hospital Contract, 207
   Group Structures, 207
How to Keep the Job, 208
   Policies, Procedures, Rules, and Regulations, 208
   Working Relationships, 208
Appendix 11-1. Template for a Curriculum Vitae, 210
Appendix 11-2. Cover Letter Template, 210
Appendix 11-3. Interview Questions, 211
Appendix 11-5. Checklist for a Professional Services Contract, 214

12 Laboratory Laws and Regulations .............................................. 215
Elizabeth A. Wagars
A Landmark Laboratory Law, 215
Regulatory Affairs for the Laboratory Leader, 218
   Clinical Laboratory Improvement Amendments (CLIA), 218
   Food and Drug Administration, 220
   Research Administration, 222
   Regulatory Context of Accreditation Programs, 223
Responsibilities, 224
   Laboratory Director, 224
   Technical Consultant, 225
   Clinical Consultant, 225
   Technical Supervisor, 225
   General Supervisor, 225
   Testing Personnel, 225
Application Procedures, 226
   CLIA Certification, 226
   Laboratory Inspections, 227
Metrics Applicable to CLIA Regulations, 228
   Test Validation, 228
13 Legal Affairs for Pathologists ................................................................. 235
Elizabeth A. Wagar
The Lawyer and the Doctor: A Contrast in Philosophies, 235
Pathologists’ Effect on Their Liability, 236
  Civil Law and Torts, 236
  Malpractice Ruling Requirements, 237
  Direct Injury, 237
  Indirect Injury, 237
  Malpractice Prevention, 238
  Documentation, 238
  Incident Reports, 239
  Communication of Protected Health Information, 239
  Direct Communication to Patients, 239
Pathologists’ Effect on the Liability of Others, 240
  Autopsies, 240
  Nonfatal Lesions, 241
Subpoenas, Depositions, Court Appearances, and Other Legal Activities, 241
  Court Systems, 241
  Witnesses, 241
  Trials, 242
Working with Risk Management, 244
How to be an Expert Witness, 245
Case Example: How to Handle the First Subpoena, 245

14 Ethics for Pathology and Laboratory Medicine ............................................. 249
Elizabeth A. Wagar
The Philosophical Framework for Values and Ethics, 249
The Seven Principles of Medical Ethics, 250
  Autonomy, 251
  Veracity, 251
  Beneficence, 251
  Nonmaleficence, 251
  Confidentiality, 252
  Justice, 253
  Role Fidelity, 253
Bioethics, 253
Individual Professional Responsibility, 253
  Personal Guidelines for Ethical Behavior, 253
  Medical Practice Rules and Regulations, 254
Codes for Ethical Behavior in the Profession, 255
How the Institutional Ethics Committee Can Help With Ethical Questions, 256
The Laboratory Director: Confronting Ethical Issues in the Laboratory, 258
Case Example: Should Laboratory Technologists Order Laboratory Tests on Family Members?, 257
Appendix 14-1. Principles of Medical Ethics, 259
List of Acronyms ................................................................. 261
Index .................................................................................. 265
