---

## **Contributors** **xi**

---

### **Chapter 1**

---

## **Defining the Role of the Biospecimen Repository at Your Institution** **1**

---

*Donna E. Hansel, Scott D. Jewell*

Getting Started, 1

Obtaining Institutional Support, 1

### **Chapter 2**

---

## **Getting Started: Developing an Institutional Resource Within the Pathology Department** **3**

---

*Donna E. Hansel, Angen Liu*

The Pathology Department as a Central Processing and Tissue Management Hub, 3

Storage of Biospecimens by Subtype, 4

Interaction of a Centralized Biorepository With Investigator-Based Satellite Banks, 7

Balancing Departmental Versus Institutional Needs for a Central Biorepository, 7

Obtaining Institutional Support for Enforcement of Pathology-Based Biorepository Policies, 8

### **Chapter 3**

---

## **Management and Key Personnel of the Biospecimen Repository** **9**

---

*Nilsa C. Ramirez, Laura Monovich*

Introduction, 9

Organizational Structure of the Biospecimen Repository, 9

The Biospecimen Repository Director, 11

Key Personnel of the Biospecimen Repository, 12

    Program Manager, 12

    Laboratory Manager, 12

    Informatics Manager, 12

    Accounting Coordinator, 13

    Regulatory Coordinator, 13

    Investigator Services Coordinator, 13

    Laboratory Technician(s), 14

- Staff Training Requirements, 14
  - Training Resources, 15
  - Training Responsibilities, 15
  - Training Documentation, 15
  - Training Frequency, 16
  - Continuing Scientific Education, 16
- Time and Salary Commitment, 16
- Interactions With the Institutional Review Board, 16
- Governance and Oversight, 17
- Appendix: Material Use Agreement, 20

## Chapter 4

### Infrastructure of the Biospecimen Repository and Associated Core Laboratories

23

*M. Scott Lucia, Adrie van Bokhoven*

- Determining the Scope of the Biorepository: What Specimens Will Be Archived?, 23
- Determining Biobank Space and System Requirements, 25
- Receiving and Processing, 27
- Location and Design Considerations, 27
- Ancillary Core Laboratory Services, 28
- Histology and Immunohistochemistry, 28
- Tissue Imaging and Laser Capture Microdissection, 29
- Tissue Microarrays, 29
- Equipment and Special Handling, 29
- Conclusion, 31

## Chapter 5

### Flow of Biospecimens: From the Clinic or Operating Room To and From the Biospecimen Repository

33

*Daniel Rohrer, David W. Chesla, Scott D. Jewell*

- Introduction, 33
- Structure and Functions of the Biorepository, 33
- Standardization of Biospecimen Collection Using Biospecimen Kits, 34
- Participant Identification and Informed Consent, 35
- Biospecimen Collection, 37
- Education and Establishment of Policies for the Collection of Tissues, 39
- Biospecimen Processing and Quality, 40
- Biospecimen Storage, 41
- Distribution of Biospecimens, 42
- Distribution Policies and Procedures for Biospecimens, 42

## Chapter 6

### Quality Control: Providing Useful Specimens to Investigators

45

*Sarah M. Dry, Clara E. Magyar*

- Background, 45
- Steps That Biobanks Can Take to Optimize the Quality and Usefulness of Stored Specimens, 46
- Identification and Monitoring of Biospecimen Variables, 47
- Variables in Procurement, Processing, and Storage, 48
- Quality Control Procedures for Specimen Procurement, 49
- Quality Control Measures During Biospecimen Storage, 50
- Documentation of Specimen Quality Measures, 51

Quality Control Measures Before Distribution, 52  
Quality Control for Equipment and Staff, 52  
Summary, 53

## **Chapter 7** **Biorepository Informatics**

55

*Mark A. Watson, Rakesh Nagarajan*

System Design, 55  
Data Elements, 57  
    Participants and Protocols, 57  
    Specimens, 58  
    Processing Events, 59  
    Inventory and Transport, 59  
    Quality Assurance, 59  
    Consent, 60  
    Clinical and Pathology Data Annotation, 60  
    Experimental Annotation, 60  
    Requests, Utilization, and Productivity, 61  
    Class Relationships, 61  
Vocabularies, 62  
User Interface, 62  
Identifiers, Labeling, and Barcodes, 63  
Data Access, 64  
Reporting, 65  
Security and Data Integrity, 65  
Hardware, 66

## **Chapter 8** **Biorepository Informed Consent Process**

67

*Nicole J. Sieffert*

Informed Consent for Biospecimen Use in Research, 67  
The Informed Consent Process, 67  
Legally Effective Informed Consent, 67  
The Common Rule, 67  
Exceptions to Application of the Common Rule, 68  
Required Elements of Informed Consent, 68  
Optional Elements of Informed Consent, 69  
Maximizing the Clarity of Informed Consent: Additional Elements, 70  
Method of Consent, 72  
    Paper Consent, 72  
    Electronic Consent, 72  
    Video Consent, 72  
    Web-Based Consent, 73  
Timing of the Consent Process, 73  
Designing the Consent and Parental Permission Processes to Facilitate Understanding, 74  
Limitations of Informed Consent, 74  
Consent Document Format, 74  
Models of Consent for Biorepositories, 74  
    Presumed Consent (“Opting Out”), 74  
    Broad Consent, 75  
    Partially Restricted Consent, 75

Multilayered Consent, 75	
Specific (Fully Restricted) Informed Consent, 75	
Documentation of Informed Consent, 75	
Obtaining and Documenting Consent for Non-English-Speaking Participants, 76	
Consent With Diminished Decision-Making Capacity, 76	
Consent in an Urgent Setting, 76	
Minimizing the Possibility of Coercion or Undue Influence, 76	
Requirements for Assent and Parental Permission in Research With Children, 77	
Supplementing Initial Consent of Parental Permission, 78	
Documenting Child Assent, 78	
Waiving or Altering the Requirement for Documentation of Informed Consent or Parental Permission, 79	
General Recommendations, 79	
Conclusions, 79	

## Chapter 9

### Cost Assessment for Developing an Institutional Biorepository

81

*Scott D. Jewell, Dana Valley, Daniel Rohrer*

Mission-Related Cost and Biorepository Value, 81	
Assessment of the Biorepository Translates to Cost, 82	
Biorepository Budgets: Revenue Minus Expenses Equals Subsidy, 82	
Conclusion, 85	

## Chapter 10

### Relationships With Outside Institutions and Industry

87

*Kimberly Myers, Nicole Lockhart*

Perception of Sale of Tissue, 87	
Oversight of Agreements With Industry or Other Parties, 89	
Access to Biospecimens and Data, 89	
Intellectual Property and Authorship Policies, 91	
Partnering to Create Sustainable Resources, 92	
Conclusion, 94
