Foreword	vi
Preface	vii
Glossary of Terms	ix
Contributors	xi
Introduction	1
■ Five most common mistakes made in phlebotomy	
Why Is Collecting a Blood Sample Important?	2
■ What are you doing when you collect a blood sample?	
■ A closer look	
You and Your Patient	2
■ How do you inspire confidence?	
■ How do you gain confidence in your ability?	
■ How do you present a professional appearance to your patient?	
How Do You Protect Your Patient and Yourself Using Standard Precautions?	4
■ Latex hypersensitivity	
Sterility	5
■ Hand cleansing	
■ Tourniquet hygiene	
■ How to handrub	
■ The three-minute scrub	
Disposal of Used Materials	8
What Is Blood?	9
■ What does blood do?	
Recommended Volume Limits for a Single Blood Draw	10
How Is Blood Collected?	11
■ Orientation of blood components following centrifugation	
Blood Collection Equipment	12
■ Blood collection systems	
■ Needle gauge and hemolysis	
■ Butterfly needles	
■ Additives	
■ Anticoagulants used in blood collection tubes	
■ Important tips to remember	
■ The blood collection tray	
The Phlebotomy Area	16
The Test Requisition	16
Representative Blood Collection Tubes	18
Timed Specimens	19
■ The single timed specimen	
■ Multiple timed specimens	

Approaching the Patient _____	20
■ Patient approach, identification, and reassurance	
■ Patient Bill of Rights	
■ HIPAA compliance	
■ Correct patient identification is crucial!	
■ Inpatients and outpatients with wristbands	
■ Outpatients (ambulatory patients) with no wristband	
The Venipuncture From an Arm Vein _____	23
■ Arterial punctures	
■ Preparing the patient	
■ Hospitalized patient in bed	
■ Hospitalized patient not in bed	
■ Outpatient/ambulatory patient	
■ Home visits	
■ Selecting the vein for venipuncture	
■ Performing the venipuncture	
■ Common errors	
■ You have collected the blood specimen ... what next?	
■ Multiple specimen collection	
■ Adequate fill of the evacuated tube	
■ Avoid hemolysis	
■ If blood fails to enter the evacuated tube	
■ What do you do if you still cannot get blood from the vein?	
■ You still don't get blood ... what now?	
■ Evacuated tube type	
Recommended Order of Draw for Multiple Specimen Collection _____	31
The Difficult Venipuncture _____	32
■ Special considerations	
Intravenous Fluids and the Venipuncture _____	32
■ What do you do when a patient is receiving an intravenous infusion?	
■ Documentation of intravenous administration	
Collection of Venous Blood Gases _____	33
Identification and Labeling of the Blood Specimen Tube _____	34
■ Special precaution	
■ Specimen transport	
The Difficult Patient _____	36
■ What do you do?	
The Missing Patient _____	36
■ The routine specimen	
■ The timed specimen	
The Patient Has a Reaction _____	37
■ What to do if the patient has a reaction	
■ Reaction of a patient in bed	
■ Anxiety: signs and symptoms	
■ The most severe reaction	

The Skin Puncture	39
■ Performing a skin puncture	
■ Skin puncture equipment	
■ Order of draw for skin punctures	
■ Use of disposable retractable lancet devices	
■ Preparing the patient's finger	
■ Puncturing the finger of a child (>1 year of age) or an adult	
■ Eliminating the first drop	
■ Collecting the blood drop	
■ Safety alert	
■ Labeling	
Obtaining Blood From Babies	42
■ Performing the heelstick	
■ Contraindications to heelstick	
■ Summary of procedures for babies in the nursery	
■ Collection of blood spot specimens for neonatal screening programs	
The Blood Smear	46
■ Capillary method	
■ Using venous blood	
■ Common errors	
The Blood Culture	47
■ Blood cultures from intravascular lines	
■ Careful technique is a must	
Collecting Blood Specimens Under Special Circumstances	49
■ The psychiatric unit	
■ Radiation hazards	
■ The patient in isolation	
■ Procedures in the nursery	
■ Paternity/forensic identity testing	
Your Safety	51
■ Protected health information	
Competency Assessment	52
Your Attitude	53
■ How will this experience affect you?	
Appendix 1. Drawing Blood from Existing Intravascular Devices	54
Appendix 2. Intraosseous Cannulation Used for Blood Analysis and Infusion	56
Appendix 3. Aids for Visualizing Veins Under the Skin	58
Appendix 4. Ultrasound-Guided Peripheral Intravenous Cannulation	59
Appendix 5. Quality Assurance	60
Appendix 6. Additional Resources	63
Index	73
